

MR. GREEN

What are the innovations Amory Lovins uses to save energy in his house?

What is the purpose of the RMI (Rocky Mountain Institute) and who are some of its clients?

What is the problem with coal and nuclear power? What is Lovins's alternative?

The article mentions a number of inefficiencies associated with commonplace locations and activities. What are they and what are the inefficiencies?

What are some of the arguments against Lovins's ideas?
