Jewish Partisan Educational Foundation
- Consulted on e-learning formats and technical specifications for educational website
 - Provided focus group and user testing
- 1999 - 2000 **Part-Time Faculty**
Ohlone Community College, Fremont
- Taught Intro to Black & White Photography and Digital Graphics Lab
- 1998 - 1999 **Graduate Student Instructor**
University of California, Berkeley
- Taught Introduction to Visual Thinking, Art Practice Department

CLASSES TAUGHT

FS103 Color Theory

In this course, students discover color theory, including additive and subtractive color. Discussions of color and its relationship to composition, through harmony and contrast, will be explored.

FS122 Image Manipulation

Students develop basic image manipulation skills in a raster-based computer environment. Emphasis is placed on mastering the fundamentals of scanning, color management, photo retouching, imaging effects, filters and masks.

G133 Digital Image Manipulation (online course)

This course is designed to explore photo retouching, image manipulation and the creation of original artwork using computers and appropriate software. Compositing, color adjustment and effects through the use of filters is covered.

GD1125 Introduction to Photography

This course introduces the elements of photography and explores its impact and various applications as a vehicle to convey a visual message. Students learn the operation of cameras, such as: 35 millimeter and digital, and the principles of composition, lighting and depth of field as well as the concepts of portraiture, narrative and documentary.

GD2244 Advanced Image Manipulation

This course builds upon the Image Manipulation class to integrate raster and vector graphics with concerns for varied formats including web and print graphics. Students create visual messages and focused visual statements and gain an understanding of the differences in web and print graphics.

GD3371 Project Study

While observation and documenting their own work, students focus on projects within an area of Information Design.

GD3383 Photography II

This course focuses on how the visual and verbal narrative inter relates through time and space. Principles of storytelling, narrative, structures, rhythm, audience and point of view will be developed.

GD4400 Special Topics in Graphic Design: Advanced Photography

Explores both historical and contemporary techniques in photography. Students work in traditional and digital darkroom and studio locations and use advanced manipulation techniques to create a coherent body of work.

GD4400 Special Topics in Graphic Design: Web Design

This course explores of the process of web design from proposal to production. Students redesign, produce and user test a website with web and image editing software.

GD4401 and GD4402 Design Team I & II

Students utilize their knowledge of design, typography, and production techniques to execute a team project with a non-profit client. Students also apply communications, teamwork, and organizational skills. Students work with clients to achieve a common goal, similar to industry experience.

GD4412 and GD4413 Senior Project I & II

Students develop an independent project utilizing sustainable design. Development of a long-term assignment and extending the skills learned in previous studio classes are emphasized. Research into sustainability and green materials is emphasized.

HU130 Visual Language & Culture

The media revolution communicates through images as much if not more than through words. Strategies of interpretation and theories of visual logic are introduced as well as an overview of the history of visual art.

HU333 Contemporary Art

Students concentrate on contemporary art issues, as well as become aware of current trends and styles of art in their surrounding communities. Students also explore the social, political and cultural environments of existing artistic expressions as they relate to current events.
