Lecture: 22 Hours

Lab: 22 Hours

Credit Value: 3 Credits

Course Competencies:

Upon successful completion of this course, the student should be able to:

- Compare and contrast hue, value, and saturation
- Apply the concepts of unity, variety, contrast, dominance, appropriateness, balance, and harmony to their design
- Compare and contrast additive and subtractive color theory
- Distinguish the relative aspects of color perception (e.g., psychological and cultural aspects) as they apply to solving design problems
- Differentiate between color used as symbol, as expression, and as description
- Identify and define which color theories apply to different input/output devices
- Identify color choices and ways
- Demonstrate the design concept visually through sample boards, etc

Process for Evaluation:

- Class projects are graded on accuracy of color mixing, neatness and overall design.
- The final portfolio must contain work collected and created throughout the quarter.
- You are responsible for all material covered in lectures, readings and discussions.
 - Arrive on time - lectures and demos will take place at the beginning of each session.
 - All are required to participate in critiques, missing critique lowers your work one letter grade.
 - You are responsible for the work missed due to any absences.
 - All work must be received by the set deadlines, **NO LATE WORK** will be accepted.

- On-time projects may be redone with instructor approval.
- Midterm and final quizzes CANNOT be made up and must be completed on the assigned day.
- ABSOLUTELY NO WORK WILL BE ACCEPTED AFTER THE FINAL CLASS MEETS WEEK 11.

Classroom Policy:

- No food allowed in class or lab at any time. Drinks in recloseable bottles allowed in classroom.
- Break times are scheduled by the instructor at appropriate intervals.
